The Asa Gray Bulletin Devoted to Plant Life in Field, Forest and Garden Volume 1-2

By Asa Gray

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 edition. Excerpt: . . . of water or at least where they will be kept moist. A few such as Spirogyra, Mesocarpus, can be pressed out in the hand and the green wad thrown into the basket or can to be soaked up later. As far as possible algae should be collected in fruit. In most cases this is necessary for their specific identification. A very convenient way is to carry two glass slides and a tolerably good pocket lens. Place the algae between the glass slides and examine closely with the lens. In the larger alga the fruit is usually large enough to be seen in this way. Some forms, as Cladophora, never produce fruit and these can be collected at any time. In many of those too small to be seen with the hand-lens the fruit, if present, is not so important in classification. If the algae are...
