

Introduction to Algorithms, (Third Edition)

Filesize: 9.07 MB

Reviews

These kinds of ebook is the ideal book readily available. Better then never, though i am quite late in start reading this one. You may like the way the blogger publish this ebook.

(Miss Pat O'Keefe Sr.)

INTRODUCTION TO ALGORITHMS, (THIRD EDITION)

PHI Learning, 2010. Softcover. Book Condition: New. 5th or later edition. 18 x 24 cm. This internationally acclaimed textbook provides a comprehensive introduction to the modern study of computer algorithms. It covers a broad range of algorithms in depth, yet makes their design and analysis accessible to all levels of readers. Each chapter is relatively self-contained and presents an algorithm, a design technique, an application area, or a related topic. The algorithms are described and designed in a manner to be readable by anyone who has done a little programming. The explanations have been kept elementary without sacrificing depth of coverage or mathematical rigor. The third edition has been revised and updated throughout. It includes two completely new chapters, on van Emde Boas trees and multithreaded algorithms, and substantial additions to the chapter on recurrences (now called "Divide-and-Conquer"). It features improved treatment of dynamic programming and greedy algorithms and a new notion of edge-based flow in the material on flow networks. Many new exercises and problems have been added in this edition. The text is intended primarily for students studying algorithms or data structures. As it discusses engineering issues in algorithm design, as well as mathematical aspects, it is equally well suited for self-study by technical professionals. CONTENTS: Preface I Foundations Introduction 1 The Role of Algorithms in Computing 2 Getting Started 3 Growth of Functions 4 Divide-and-Conquer 5 Probabilistic Analysis and Randomized Algorithms II Sorting and Order Statistics Introduction 6 Heapsort 7 Quicksort 8 Sorting in Linear Time 9 Medians and Order Statistics III Data Structures Introduction 10 Elementary Data Structures 11 Hash Tables 12 Binary Search Trees 13 Red-Black Trees 14 Augmenting Data Structures IV Advanced Design and Analysis Techniques Introduction 15 Dynamic Programming 16 Greedy Algorithms 17 Amortized Analysis V Advanced Data Structures Introduction 18 B-Trees 19...
