Yawls shall be rated at 93 per cent., and schooners at 90 per cent., of their measurement as determined from the above formula. Measurements shall be made in accordance with the provisions of this rule. Before being measured, a yacht must have a load water-line plane established and permanently marked at bow and stern and on each side of the yacht near the point of greatest breadth. This plane shall be, as nearly as practicable, the plane of flotation when in racing trim. Each side mark shall consist of two equal equilateral triangles, whose apices touch at the established plane of flotation and whose bases are parallel to such plane. The total vertical height of each side mark shall be one two-hundredth (20) of the load water-line length. The bow and stern marks shall be four (4) inches long and two (2) inches in vertical height so placed that the bottom of the marks shall indicate the position of the established plane. LENGTH. When in trim, both under cruising and racing restrictions, the vessel floating on an even keel in sea water of usual density, both side marks must be cut by the surface of the water. This load water-line plane is to be the plane from which all calculations are made, including displacement, quarter-beam length, and draft. When once established it cannot be changed before the beginning of the next racing season, unless the yacht has undergone extensive alterations in hull. Notice of...
